954.         <p class="mb-0 w-75">Ok i know why... Using <strong>Babel</strong> will  
transform <code>async</code>/<code>await</code> to generator function and  
using <code>forEach</code> means that each iteration has an individual  
generator function, which has nothing to do with the others. so they will be  
executed independently and has no context of <code>next()</code> with others.  
Actually, a simple <code>for()</code> loop also works because the iterations  
are also in one single generator function.</p>↔
